

Report on 2022 Lodge Renovations by Jerry Podany

In order to bring the upper level of the Lodge up to compliance for our occupancy permit, we have submitted plans to Delhi for a building permit.

The plans are to replace the portion of the deck that was removed last year for the basement wall repair, add an ADA bathroom and an office for administration, as well as an additional door to the prayer room, new front doors to the office, a middle hand railing on the front stairs.

We have allocated \$20,000 for these renovations. The plan is to hire an electrician, plumber and mechanical engineer as licensed professionals for those areas. We are planning on a team effort of volunteers for demolition, building walls, painting etc.

When we have received our occupancy permit, we plan to upgrade the lower level Lodge bathrooms and meeting rooms with available remaining funds.
